

# 10 reasons **NOT** to hire a “Web Designer”

1. You will not be able to update it yourself.
2. Your site will be coded in a language you don't understand.
3. Changes cost per extra \$\$\$ You can't afford the monthly maintenance fees or add on fees.
4. You may not own the domain name.
5. Website designers don't care how important that spelling change is (the time to do the change).
6. Your site will be held hostage or even shut down if you decide to change designers, because you don't have all the rights to the site.
7. Your site will not be customized to your needs.
8. You will not be given administration rights to change the graphics.
9. The design of your \$299 site is outsourced to a foreign country using the same templates as every other \$299 website company.
10. Your website designer really only wants your monthly hosting fee.

Key Lime Creative prides itself on creating customized, self hosted, client managed websites. All of our websites include training, client ownership of domains & no maintenance fees!

If you would like to talk to us more about building a website that works for you, Call us at 1-877-553-1805 or [request a quote.](#)

Ask me about adding one of these QR Codes to your design. It's free and easy!
